## CURRICULUM OVERVIEW

### Degree Associate of Science - Surgical Technology

71.5 CREDITS - 1610 CLOCK HOURS - 90 WEEKS

The surgical technology program is designed to provide students with the necessary knowledge and skills required to practice in the operating room environment. The surgical technologist is an integral part of the operating room team. Surgical technologists work under the supervision of a surgeon and an operating room nurse to ensure that the operating room environment is safe, equipment is functioning properly and that during the operative procedure all team members are maximizing patient safety. Students study topics that include hospital organization, safety and legal issues, anatomy and physiology, aseptic technique, surgical procedures. Upon successful completion of the program, graduates will have acquired the skills required for entry-level positions in a variety of settings.

Brookline College prepares students in the Surgical Technology program to take certification and/or licensure exams related to their program of study.

### Program Concentration Courses

STM 101 Introduction to Surgical Technology  
STM 102 Principles and Practice of Surgical Technology I
